Comments: Provide any clarifying information, including number of fish observed, location of fish survey data, etc.

Most years this creek - because of damage caused
by railroad work - is so low or dry that fish
cannot pass up. But if conditions are correct a
fair run of pinks can spawn there.

Attach a copy of a map showing location of mouth and upper points of each species, specific stream reaches identified for spawning or rearing, locations of barriers, such as falls. Attach a copy of the fish survey data, if available.
